Fabeha Rizvi

Frontend Engineer (React, React Native)
Delhi, India | fabrizvi786@gmail.com | linkedin.com/in/fabcodingzest | github.com/fabcodingzest | fabcodingzest.com

SUMMARY

Frontend engineer with 3+ years of experience, from React web to React Native. Co-founder and frontend lead of Boraami: set up its mobile app from the first commit, led a team of 4, built its React admin dashboard, became its main backend developer in mid-2025, and took the app from beta to launch on both stores (2,000+ downloads, 99.7% crash-free users).

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML, CSS
Frontend: React, React Hooks (incl. custom hooks), Redux Toolkit, RTK Query, Vite, Tailwind CSS, shadcn/ui, Material UI, Responsive Design, Performance Optimization
Mobile: React Native, Expo, Expo Router (React Navigation), Tamagui, EAS Build, iOS & Android, App Store / Google Play Deployment, Push Notifications (Expo Push, Firebase Cloud Messaging, APNs)
Backend: Node.js, Express, MongoDB, REST APIs, Socket.IO
Tools: Git, GitHub, Sentry, Amplitude, Cloudflare Workers

EXPERIENCE

Boraami LLC | boraami.app | Remote, team across 5+ countries
Co-founder, Frontend Lead (React Native) | Nov 2022 – Present
Community social app, live on the App Store and Google Play. Co-founder since Nov 2022 (product concept, design direction, team coordination); frontend lead since the first commit in Jan 2024.

Leadership & Delivery

- Set up the app from the first commit and took it from beta to public launch on both stores, handling builds, releases, and store reviews: **2,000+ downloads**, **1,700+ users**, ~350 monthly active users.
- Led a team of 4 developers to build a **23+ component** Tamagui design system with light/dark themes; reviewed code, guided juniors, and worked with designers and PMs across time zones.

Mobile App (React Native)

- Improved crash-free users from ~95% to **99.7%** (Sentry) by debugging and fixing Android out-of-memory crashes (virtualized GIF picker, smaller feed images).
- Made likes and reposts feel instant with optimistic updates that roll back on failure; built threaded replies, quote posts, and mentions.
- Built real-time and push notifications (Socket.IO, Expo Push), with REST reconciliation so a missed event can't leave the unread count wrong.

Admin Dashboard & Trust and Safety (React)

- Built the React admin dashboard (TypeScript, Vite, shadcn/ui, Tailwind) moderators have used since launch to review applicants, reports, and users.
- Built store-required safety features (blocking, reporting, profanity filter), plus 13+ age gating, suspensions, and roles.

Backend (main developer since mid-2025)

- Took over the existing Node.js/Express backend, adding endpoints and models for auth, notifications, blocking, and account deletion.
- Built an admission quiz that auto-decides clear cases and sends borderline ones to moderators; **2,400+ applications** processed.

Frontend Developer (Contract) | Wayfareoworld Advent Pvt Ltd | Dec 2021 – May 2022 | Delhi, India

- Built patient and doctor portals, appointment booking, and payment flows for a healthcare web platform using React, Redux, Material UI, and REST APIs.

EDUCATION

Bachelor of Computer Applications | Indira Gandhi National Open University | Jan 2018 – Jun 2021

PROJECTS

TradeByte (github.com/fabcodingzest/TradeByte): Second-highest contributor (team of 6) in the GirlScript Uplift open-source program; built Google OAuth, dashboards, and Razorpay payments.

React Movie Library (github.com/fabcodingzest/React-Movie-Library): Movie discovery app with search and recommendations (TMDB API, Context API + useReducer, Tailwind).
