

Fabeha Rizvi

Frontend Developer (React, React Native)

Delhi, India | fabrizvi786@gmail.com | fabcodingzest.com | linkedin.com/in/fabcodingzest | github.com/fabcodingzest

SUMMARY

Frontend developer with 3+ years of experience, starting in React on the web and moving into React Native. Co-founder and frontend lead at Boraami: set up its mobile app from the first commit, led a team of 4 developers, and became its main backend developer in 2025. The app is live on both stores with **2,000+ downloads** and **99.7% crash-free users**.

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML, CSS

Frontend: React, React Hooks, Redux Toolkit, RTK Query, Vite, Tailwind CSS, shadcn/ui, Material UI

Mobile: React Native, Expo, Expo Router, Tamagui, EAS Build, iOS, Android, App Store, Google Play, FCM, APNs

Backend: Node.js, Express, MongoDB, REST APIs, Socket.IO

Tools: Git, GitHub, Sentry, Amplitude, Cloudflare Workers

EXPERIENCE

Boraami LLC | boraami.app | Remote, international team

Co-founder, Frontend Lead (React Native)

Jan 2024 – Present

Community-driven social app for the BTS fan community, live on the App Store and Google Play. Part of the founding team since Nov 2022 (product concept, design direction, team coordination).

Leadership & Delivery

- Set up the app from the first commit and, with the team, took it through a 50+ tester beta to launch on both stores; I run EAS builds, releases and store reviews. **2,000+ downloads, 1,700+ users, ~350 MAU**.
- Led a team of 4 frontend developers across time zones to build a Tamagui design system of **23+ components** with light and dark themes; reviewed code, guided juniors and worked closely with design and product.

Mobile App (React Native)

- Improved crash-free users from about 95% to **99.7%** by fixing Android out-of-memory crashes: virtualized the GIF picker and served smaller feed images.
- Made likes and reposts feel instant with optimistic updates that roll back on failure (RTK Query); built threaded replies, quote posts and @mentions with autocomplete.
- Built in-app and push notifications: Socket.IO real-time updates with REST reconciliation on reconnect, plus Expo Push.

Admin Dashboard & Trust and Safety (React)

- Built the React admin dashboard (TypeScript, Vite, shadcn/ui, Tailwind CSS) that moderators use to review applicants, reports and users; deployed on Cloudflare Workers.
- Built the trust and safety features the stores require: blocking, reporting, a profanity filter, 13+ age gating, suspensions and role-based access.

Backend (main developer since mid-2025)

- Took over the Node.js, Express and MongoDB backend and extended it: endpoints and models for auth, notifications, blocking and account deletion, plus direct image uploads to Cloudflare R2.
- Built an admission quiz that auto-approves or rejects clear cases and sends borderline ones to moderators, with email notifications; it has processed **2,400+ applications**.

Wayfareoworld Advent Pvt Ltd | Delhi, India

Frontend Developer (Contract)

Dec 2021 – May 2022

- Built responsive React web apps for a healthcare platform: patient portal, appointment booking and payment workflows integrated with third-party APIs.
- Managed state with Redux and integrated REST APIs in an agile team. Tech: React.js, Redux, Material UI.

PROJECTS

React Movie Library (movielibriz.netlify.app): Movie discovery app using the TMDB API with search, categories and recommendations; Context API and useReducer, Tailwind CSS.

TradeByte (github.com/fabcodingzest/TradeByte): Second-highest contributor in the GirlScript Uplift open-source program (team of 6); built Google OAuth, dashboards, email notifications and Razorpay payments. Node.js, Express, MongoDB.

EDUCATION

Bachelor of Computer Applications | Indira Gandhi National Open University | Jan 2018 – Jun 2021
